

SAFETY MANAGEMENT

Accidents are undesirable, unplanned occurrences, which may result in tragic consequences: bodily harm, loss of school time, property damage, legal action, and even fatality. It shall be the policy of the Board to guard against such occurrences by taking every possible precaution to protect the safety of all students, employees, visitors and others present on district property or at school-sponsored events.

The practice of safety shall also be considered a facet of the instructional plan of the district schools by virtue of educational programs in traffic and pedestrian safety, athletic safety, driver education, fire prevention, emergency procedures, etc., appropriately geared to students at different grade levels.

Each principal shall be responsible for the supervision of a safety program for his/her school, and the superintendent shall have overall program of the district. General areas of emphasis shall include, but not be limited to: inservice training; accident record keeping; plant inspection; driver and vehicle safety programs; fire prevention; and emergency procedures and traffic safety problems relevant to students and employees.
